**PACIFIC**

**BUSINESS COLLEGE,**

MECHANIC'S INSTITUTE,

POST STREET, Between Montgomery & Kerney SAN FRANCISCO,

The importance of a thorough and practical business training for those who contemplate entering the mercantile profession, is too well known to require much comment. Without such knowledge, the young merchant will become involved in many embarrassments which might otherwise be avoided. The youthful aspirant will find himself surrounded by inextricable difficulties, both in seeking a situation, and in the discharge of its duties after employment is obtained. To have received instruction at a mercantile college, endorsed by the leading merchants of the city, is more effective in winning the favor and confidence of a business firm, than all the letters of introduction which friends can give. The

**Pacific Business College**

maintains a reputation for thoroughness and systematic training, far surpassing that of any other similar institution on the Pacific coast. Most of the leading merchants of this city have employed graduates from this College, and bear testimony to the practical efficiency of the course here prescribed. The system of actual practice embraces all the varied operations of real business. A Ladies' Department has lately been added to this popular institute. This spirit of enterprise cannot fail to draw forth the well-wishes of the public.

Address for all information,

VINSONHALER & DE LAGUNA,

**A CARD**

We the undersigned, merchants and business men of San Francisco, California, are at the present time, employing men who have completed the prescribed course of study at the Pacific Business College, and we take pleasure in stating that we have found them well posted in accountantship and the general principles of business, showing conclusively that they have been subjected to a thorough drill in those important matters, by experienced and competant instructors.

We cheerfully recommend the College as being in our opinion, an institution of intrinsic merit, and well worthy of the confidence and support or the community.

**OVER THE WAY.**

There's a wedding to-night over the way;
The guests are quite cheerful, merry and gay;
And the bridegroom, exultant, is bright as the day—
Haste to the wedding over the way!

There is music and dancing over the way;
Music and dancing, lively and gay;
And the beautiful bride, like a flow'ret of May,
Graceful and happy is over the way.

There is a funeral over the way,
For the sunlight has gone—the light of the day;
And the bridegroom bereaved no more is gay,
And he bows his proud head low down to pray.

There is music and singing over the way.
But the music's a requiem and the singing a lay;
And the beautiful bride, sweet Gertie Gray,
Has passed to the kingdom over the way.

They have parted her hair, they have severed a tress,
They have kissed the cold lips, their last caress;
And now where she once went forth a bride,
She is born forth through the wide

And far opened door. Beautiful Clay,
You have long passed from over the way!
Oh, stricken bridegroom, bow low your head!
Weep in great anguish over your dead!

Bend low your head! you still can pray,
And Gertie will hear you over the way:
Ask God to guide your faltering feet
To the bright shore where the loved meet!

Ask Him to give you the heart that you may
Haste to reunion over the way!
Ask for His blessing! ask for His love!
Ask for His treasure laid up above!
Ask Him these things; He will not say the nay;
He will tenderly lead thee over the way.

**GENERAL GRANT.**

[We find the following just encomium upon the character of General Grant in the Florida *Commercial* of Feb'y 25th, and we commend it to the perusal of our Democratic friends in juxtaposition of what some of our California would-be Democratic leaders make the rank of their party consider as the leading traits of this soldier and Christian.—ED. ENQ.]

Upon that brief roll of Federal soldiers of the late civil war, upon which success has impressed the stamp of merit, Grant stands pre-eminent.

We see him coming, like Cincinnatus, from the peaceful walks of life at the call of his country; promptly taking the position assigned him; bravely, zealously discharging every trust; moving on steadily, unselfishly in the path of duty; winning promotion daringly, receiving it modestly, using it wisely; achieving triumphs where predecessors had suffered defeats; and, step by step, silently, sternly, persistently doing his duty, and rising in rank and public regard, up to that eventful ninth of April 1865, which, at Appomatox Court House, added the last leaf to the laurel crown of the soldier.

Breaking, like a long swelling and pent up flood over the field works of the Confederates, his host of one hundred and thirty thousand men forced the surrender of Lee and his band of eight thousand.—His conquest of the Confederate arms was complete, and he stood forth the foremost man in all the Federal hosts.

But his proudest place in the records of posterity was, upon that day, achieved, not by the sword, but by magnanimity.

Disparity of numbers stript his victory of all merit in the Confederate eyes; but the hearts of that eight thousand men of iron will, and of every sympathizing Southern man and woman, were subdued by his generosity.

Peace has her victories, before which those of war "pale their ineffectual fires;" and when his triumph of arms was secure, and white flags stood in advance of his serried ranks, and fluttered as far as the eye could reach upon the surrounding hills,—"when grim visaged war had smoothed his wrinkled front,"—Grant rose from a victory of war to a triumph of peace.

As the Confederate troops moved forward and formally stacked their arms, on the morning of the tenth, in the presence of the Federal army, many a bronzed cheek was wet with tears of bitter disappointment at the unlooked for result of the cause for which the Southern heart had prayed, for which it had perilled and lost everything but honor. But deep as was their emotion, they were profoundly impressed by the generous bearing of the conquerors.

Not a cheer, not a shout, not a tone nor a sign of triumph over a fallen foe was heard or seen throughout their stern, grave ranks. Brave men stood in presence of foemen worthy of their steel, and the generous impulses of the soldier rose above all political all sectional considerations.

Wherever a ragged Confederate passed, he received a respectful salute or a friendly word; and when Lee appeared at Grant's head-quarters, every head was uncovered.

The Chevalier Bayard, "*sans peur et sans reproche*," at the head of the proudest Knights of his age, and under the eye of of his great master Louis, could not have received the sword of a fallen foe with a more knightly courtesy.

When from far off in the distance, beyond an intervening wood, a shout was heard, a Federal officer dashed off to quell it; while another hastened to apologize and explain. "That comes from a portion of the rear guard; they've done none of the fighting."

In this manner did Grant perform a soldier's part in the last scene of the great military drama; and it is upon this picture—upon Gen. Grant grasping the hand of Lee, upon Gen. Grant, the just and magnanimous soldier, that posterity will ever be pleased to look.

AMONG THE HOP PICKERS.—The women who are employed to pick hops in the great hop yards of the West have some curious customs, a recital which reminds us of Tennyson's "eight strong daughters of the plow." The rules of the yard during work hours are the most rigid; and the pickers, who are paid by the quantitity, are violently opposed to any diminution of their wages by a consideration, accidental or otherwise, of gathering hops. If the box tender does not attend closely to his business and delays them by his want of punctuality, or if he is careless and lets the cross poles by which the box is carried strike the poles of the yard and jostle down the hops, he is significantly warned once or twice, and the mob punishment is resorted to. One of the pickers quietly leaves on pretense of making a visit to the other boxes. But she soon returns, reinforced by a swarm of other pickers "terrible as an army with banners." The unfortunate man at the box is seized and plunged head foremost into a hop sack, the sack tied securely and then picked up and dragged about over the ground at a fearful rate, the mobbing party meanwhile, laughing, screaming and yelling like devils. Spruce young men, while visiting yards are occasionally put through this course of treatment, to their perfect astonishment. It is worse than useless for a fellow to try to escape, or to resist in any way after he is once seized.—The wisest thing he can do is to roll himself into a ball, like a frightened caterpillar; and to submit to his fate with the best grace possible. Visitors of Western hop yards are warned to wear old clothes. A spruce young manner and stylish costume, instead of winning the admiration of these delicate damsels, only present an irresistible temptation to their peculiar pastime.—*Fanny Fern.*

**THE TUSCUMBIA TRAGEDY.**

Our place was thrown into intense excitement on last Saturday, by the shooting difficulty between Robert T. Kernachan, of Lauderdale county, and A. B. Collins, which resulted in the death of Mr. Kernachan. The facts are as follows:

Kernachan, who was intoxicated, was sitting at the same table at the Franklin House, with Collins, and immediately opposite. R. C. Goodloe, Esq., and Captain Donnelly, who were at the same table, were engaged in conversation in reference to the election in Arkansas upon the Constitution. Some one of the number remarked that the Constitution had been defeated. Collins, who was unacquainted with the gentlemen engaged in conversation, asked from what source they had their information. He was answered, "from the Memphis papers." Collins then said, "the Constitution has been ratified by from two to three thousand majority." He was asked from what source his information came. He replied, "from the Memphis *Post*." Mr. Kernachan said to Collins, "You are one, I believe who thinks a negro is as good, if not better, than a white man." Mr. Collins said: "I don't know; I am in favor of every man having his rights and keeping his place." Kernachan said: "If I had you out of doors I could clean you out." Some other conversation then took place between them in a low tone of voice, not heard by persons who sat next to Kernachan, when Kernachan was seen to draw his pistol. As soon as he got his pistol nearly presented, Collins shot him, the ball entering the breast. As Kernachan was sinking his pistol was fired, entering and passing through the table to the floor; he then fell to the floor.

No one seemed to be noticing Collins, and his movements were not seen until he was up and shooting. The room was filled with ladies and gentlemen at dinner. The parties were not acquainted with each other. Kernachan was so drunk that he made several efforts to get his pistol before he drew it. Collins made no effort to avoid the difficulty, or to get out of the way; but as soon as Kernachan drew his pistol, fired and killed him. As soon as Collins fired he started for the door and left the house. He was arrested.

FORE-RUNNERS AND GHOSTS.—"Do you believe in fore-runners?" asked a nervous lady of old deacon J——.

"Yes, mam!" replied the Deacon, "I've *seen* them."

"Bless me!" exclaimed the lady; "do tell!"

"Yes," continued the Deacon, fixing his eyes with a solemn stare on a dark corner of the room, "I *see one now!*"

"Mercy, mercy on me!" shrieked the lady; "where?"

"There! there!" said the Deacon pointing to where his eyes were directed. "That cat, ma'm, may be called a fore-runner, for she runs on all fours."

Speaking of apparations: that is rather a forcible argument urged against the theory of their existence by one of the characters in "The Grimsby Ghost:" "Ghosts be hanged! It's too late in the day for 'em by a whole century; they're quite exploded; went out with the old witches. No. sir! Workmen may rise for higher wages; the sun may rise, and bread may rise, and the sea may rise, and the rising generation may rise, and all to some good or bad purpose; but that the dead and buried should rise, only to make one's hair rise, is more than I can credit. What should they rise for? Some say they come with messages for friends to the living; but they can't deliver 'em for want of breath, and can't execute 'em for want of physical force. If you come up out of your grave to serve a friend, how are you to help him? And if it's an enemy, what's the use of appearing to him if you can't pitch into him?"

Ah, my friend, between us and the other world there is an impassable wall—a wall of adamant, through which nothing can penetrate.—*Knickerbocker.*

THE Arabs possess a wise practice in proceeding for a divorce. When married people seek a separation, the Cadi orders them to live some time with a discreet and austere man of the tribe, that the latter may examine their lives. This elderly man makes a report at the expiration of the appointed time, this report is the foundation on which the Cadi builds his judgment of divorce. Experience has demonstrated that there is no better method of restoring peace in the families. The husband and wife, put thus on their good behaivor, resume the manner of courting days. Each strives to be more amiable than the other to convince the "elder of Israel" that it is not this one's fault if the honey-moon changes its quarter. Old love is awakened, and the pair that went to the approved man's tent snarling like cat and dog return home cooing like doves.

BEAUTIFUL.— When the summer of youth is slowly wasting away into the nightfall of age, and the shadows of the past year grow deeper and deeper, and life wears to its close, it is pleasant to look back through the vista of time upon the sorrows and felicities of our early years. If we have a home to shelter us, and hearts to rejoice with us, and friends gather together around our fireside, then the rough places of our wayfaring will have been worn and smoothed away in the twilight of life, while the sunny spots we have passed through will grow brighter and more beautiful.

LEARN TO WAIT.—Of all lessons that humanity has to learn in life's school, the hardest is to learn to wait. Not to wait with folded hands that claim life's prizes without previous effort, but having struggled, and crowded the slow years with trial, see no such result as effort seems to warrant—nay, perhaps, disaster instead. To stand firm at such crises of existence, to preserve one's self-poise and self-respect not to lose hold, or to relax effort, this is greatness, whether achieved by man or woman—whether the eye of he world notes it, or it is recorded in that book which the light of eternity alone shall make clear to the vision.

IN consequence of the recent troubles in Japan and of the outrage on French seaman, the French fleet in the Japanese waters is to be augmented. Orders to that effect have been issued.

MUCH DAMMING—A DAMNIBLE AFFAIR.—The envious people of San Francisco feel very much annoyed about our lake. The *Real Estate Circular* says:

"The Oakland *News* informs us that subscriptions are being made to *dam* a lake that divides the future metropolis of the Pacific from its principal rival, the city of Clinton. While we are disposed to give full credit to the citizens of that village, for all Merritt-orious enterprises, our private opinion is that within 90 days the parties who invested in property there, will be disposed to contribute generously toward *damming* Oakland generally.

Even as far up as the Feather River metropolis, they are getting excited on the subject. The Marysville *Appeal* thus notices our lake:

"Oakland is to have an artificial lake, made by damming up the mouth of the San Antonio Creek. That creek has been dammed, says the *Golden Era*, to our certain knowledge, at least by passengers detained on the boats, ever since there was an Oakland with a bar in front of it."

It is a pity that we Oaklanders can't do a little damming without all the newspapers becoming profane.—Oakland *News.*

CRAZY HORSES.—On Saturday afternoon, says the Reese River *Reveille* of April 20th, two horses which had been used by the Austin and Belmont Stage Company, were brought into the city from Smoky Valley as crazy as March hares. They were led into the city with the utmost difficulty as they were frequently attacked by violent spasms, under the influence of which they plunged frantically, and charged upon the man who was leading them. They were placed in their stable and fastened in the stalls; they remained quiet a short time, but they soon broke forth in the most violent efforts to disengage themselves, and kicked the mangers and stalls to splinters. About two o'clock on Sunday morning they kicked down the doors of the stable and ran at liberty for several hours, but they were captured and again secured. We learn that numbers of horses running an Smoky Valley are affected in a similar manner, and that several have died apparently from mania. The cause of the malady is attributed to a weed which abounds in the valley, and which is said to be sweet, and sought after by horses.

THERE is now a citizen of Ohio named Robert Knopf, confined in the Posen (Prusia) jail, on a funny charge. Mr. Knopf, who is quite a wealthy man, and had been on a visit to his old home in Prussian Poland, was on his way back to the United States, when he made, at Posten the acquaintance of a pretty young girl who pleased him so well, that he told her if she would accompany him to the United States, he would marry her as soon as they arrived in New York. She agreed to go with him; but after he had given her some money to buy new dresses, &c., she disappeared. Mr. Knopf, therefore, offered to a *gen's d'armes* ten dollars, if he would discover the whereabouts of his inamorata, whereupon the *gens d'armes* arrested him on a charge of bribery. Knopf will probably be imprisoned for three months, and the young girl, who has likewise been arrested, will be sent to the penitentiary for swindling.

A COUNTESS of Anjou in the fifteenth century paid for one book 200 sheep, five quarters of wheat, and the same quantity of rye and millet; and in early times the loan of a book was considered to be an affair of such importance that in 1299, the Bishop of Winchester, on borrowing a Bible from a convent in that city, was obliged to give a bond for its restoration, drawn up in the most solemn manner, and Louis XI., in 1471, was compelled to deposit a large quantity of plate, and to get some of his nobles to join with him in a bond, under a heavy penalty, to restore it, before he could procure the lone of a book which he borrowed from the faculty of medicine at Paris.

COMING WITH A RUSH.—A New York correspondent says there is a prospect of a great rush of mechanics and workingmen to this coast during this Summer and Fall. Webb, the great ship-builder has purchased, it is said, an enormous steamer, which will be placed on the "opposition line" to California, running at low rates of fare. The correspondent adds: "Berths are engaged three weeks ahead. The rush of emigration to the Pacific this season reminds one of the early days of the gold fever more than any thing else."

READY WITTED.—An Irishman, addicted to telling queer stories, said he saw a man beheaded with his hands tied behind him, who directly picked up his head and put it on his sholders in the right place.

"Ha! ha!" said a bystander, "how could he pick up his head when his hands were tied behind him?"

"An' sure what a fool ye are," said Pat. "Couldn't he pick it up with his tathe?"

"MY dear boy," said a kind-hearted country school-mistress to an unusually promising scholar, whose quarter was about up—"does your father design that you should tread the intricate and thorny path of the profession, the strait and narrow way of the ministry, or revel amid the flowery field of literature?" "No marm, dad says he's going to set me to work in the tatur patch."

ABOUT 100 gold and silver coins of the reigns of Charles I., Charles II., and Elizabeth, in an excellent state of preservation, were recently found in the Tyne, England. A considerable number more of coins, in gold, silver, and copper, were found at the same spot the next day. Among them were a few Dutch and Russian pieces, bearing dates from 1603 to 1792.

THE recent rise in the price of cotton has already produced a magical effect in the South. In Eastern Georgia and South Carolina alone, there is a promise of 300,000 more bales than was anticipated last fall. A New York business man, just returned from a Southern trip, says the indications point to nearly 3,000,000 bales as the total of the crop.

LATE dispatches from Japan represent that country in a state of anarchy. The boat's crew of a French corvette had been cruelly butchered by natives, who had also compelled all Foreign Agents except the English to haul down their flags.

PARIS papers mention the appointment of the brother of the Tycoon of Japan as aid-de-camp on a general staff, with a salary of 25,000 paves. The Prince attended the last ball at the Tuilleries, where his novel and brilliant costume and personal appearance created a sensation.

A HUMOROUS apothecary in Boston exposes a case of soap in his show-window with the pertinent inscription, "Cheaper than dirt."

HE who receives a good turn should never forget it; he who does one should never remember it.

A CAUTION.—The following Spanish fancy is too good to lie idle:

"I was once married, senora," remarked Pedro, "and would not like a second wife, if it were the Princess of Austria herself, on account of a story I once heard,——

"Shut up with your foolish stories," cried Maria sharply.

"Tell me, Pedro," said his mistress "it will amuse me."

"Well, then senora, once upon a time there were two friends who were greatly attached to each other, and who agreed that whichever of them died first should appear unto the other, and tell him how matters went in the other world. They were both married men, and the first who died fulfilled his promise, and appeared to his friend. "How do you get on?" asked the latter. "Famously," replied the ghost. "When I presented myself at the gate above, St. Peter said to me; 'What has been thy life!' 'Senor,' I replied, 'I am a poor man; I was married'——'Say no more,' said his holiness, 'pass in, you have gone through purgatory, and now you may enter into glory.'" Then the apparition vanished, leaving his friend greatly satisfiend and consoled. In process of time his wife died, and he married again. When the hour came that he was carried out of his house feet foremost, he presented himself in high spirits to St. Peter.—"What has been thy life," asked the Saint. "I was married *twice*," replied the new commer confidently, taking a step in advance. "Back, gossip, back!" cried St. Peter, locking the gate in his face, "we have no room in heaven for born idiots!"

THE PRINTER.—The following beautiful tribute to the followers of the "stick and rule" is from the pen of B. F. Taylor, of the Chicago Evening *Journal:*

The printer is the adjutant of thought, and this explains the mystery of the wonderful word that can kindle a hope as no song can; that can warm a heart as no hope can; that word "we" with hand-in-hand warmth in it—for the author and the printers are engineers together. Engineers indeed! When the Corsican bombarded Cadiz, at a distance of five miles, it was deemed the very triumph of engineering. But what is that range to this, whereby they bombard the ages yet to be?

There at the "case" he stands, and marshals into line the forces armed with truth, clothed with immortality and English, and what can be nobler than the equipment of a thought in sterling Saxon—Saxon with a spear or shield therein, and that commissioning it when we are dead, to move grandly on to "the last syllable of recorded time." This is to win a victory from death, for this has no dying in it.

The printer is called a laborer, and the office he performs is toil. Oh! it is not work, but asublime life he is performing, when he thus cites the engine that is to fling a worded truth in grander curve than missile e'er before described; fling it into the bosom of an age. He throws off his coat indeed; but we wonder the rather that he does not put his shoes from off his feet, for the place where he stands is holy ground.

A little song was uttered somewhere long ago; it wanders through the twilight feebler than a star; it died upon the ear. But the printer takes it up where it was lying there in silence like a wounded bird, and he sends it forth form the ark that had preserved it, and flies it on into the future with the olive branch of peace, and around the world with melody like the dawn of a spring morning.

ORIGIN OF BANKS.—The first bank established was in Italy, A. D. 808, by the Jews of Lombardy, many of whom settled in Lombard street, London, where many bankers now do business, making it, in some respects, to that city what Wall street is to New York. The word bank, as we have elsewhere explained in this calendar, originally meant a bench or table, in allusion to those on which the money brokers transacted business, and corresponding with the word counter of our days. The Mint of the tower of London, however, was anciently the place where merchants deposited their money, until Charles the First laid hands upon it, and thus destroyed its credit. Being thus compelled to find some other place of security for their funds, which excited robberies, and the peculation of their apprentices, when kept at home, they agreed, in 1645, to deposit them with the goldsmiths of Lombard street, who are provided with strong boxes for the security of their own valuable wares, and this was the origin of the banking system in England.—*The Banker.*

A GENTLEMAN who had carefully trained up his servant in the way he should go, so that when his wife was present he might not depart from it, sent him with a box ticket for a theatre to a young lady. The servant returned when the gentleman and his wife were at dinner. He had of course, been told in giving answers to certain kinds of questions, to substitute the masculine for the femine pronoun in speaking of the lady.

"Did you see *him?*" said the gentleman, giving him the cue.

"Yes sir," replied the servant. "*He* said *he'd* go with a great deal of pleasure; and that *he'd* wait for you, sir."

"What was he doing," asked the wife, carelessly.

"*He* was putting on his *bonnet*, was the reply.

There was "fat in the fire" immediately.

THE ARMIES OF THE WORLD.—At the present day the standing armies of the world are larger than they have been since the great wars of the first Napoleon. The army of the United States now numbers 56,000 men in all. France has an "active" army of 750,000, men, and "passive" of 550,000, making a total of 1,000,000 men available for war. The British army numbers 200,000, the Prussian army about 600,000, the Italian army 215,000, the Austrian army 700,000, the Russian army 800,000, the Spanish army 80,000. The standing armies of the civilized nations number not less than 3,600,000.

AN American paper says that a tall Eastern girl, named Short, long loved a big Mr. Little, while Mr. Little, thinking little of Short, loved a little lass named Long. To make a long story short, Little proposed to Long, and Short longed to be even with Little's short comings. So Short, meeting Long threatened to marry Little before long, which caused Little in a short time to marry Long. Query: Did tall Short love big Little less because Little loved Long?

SIXTEEN vessels, aggregating about two thousand tons, have already left San Francisco the present season, to engage in cod fishing on our northern coast. A large amount of capital is also invested in salmon fishing in that region.

RECENTLY a foreign gentleman, just arrived at New York by steamer, was escorted to the United States Marshal's office, where his boot heel was struck off and found to contain $8,000 worth of diamonds.

SINCE the blue lead discovery in this place was made public the miners have been busy in relocating their claims, and considerable activity prevails among that class of our citizens, nearly every one who have claims, or can procure an interest in one near the line of the supposed gravel deposit is making preparations to prospect, which gives our town and surroundings an air of business life similar to that experienced years ago. Persons who conceidered their claims worked out a short time since, now hold them as valuable, yet there are ample opportunities for investment of capital, most of those owning claims being unable to erect machinery upon them fer want of means. The chances of a profitable outlay of money by those having a few thousands were never more inviting than at the present time, and those who are the most energetic in this matter of course will secure the lion's share.

GOOD TO HAVE.—We have just been shown a silver brick obtained from the Dozier Metallurgic Company's work located at Benton, Mono county, weighing some thirty-eight ounces. We are assured that the process by which the metal is refined is not only cheap but in every way highly practicable; the cost of erecting furnaces —with one of which as much ore can be smelted as can be crushed by one stamp, about five tons. And the process thus far has been successful in every instance where it has been tried, no matter what ore or what the difficulty experienced by those best acquainted with it. Some of the rock from the Enterprise mine has been submitted to this process with highly satisfactory results, and those interested in the company assert their ability to obtain "pay" from any rock from which has been obtained a "prospect" by assay. The company expect shortly to be in condition to put up smelting works in the different districts where the common milling process has thus far proved a failure, with a guarantee of working the rock to within five per cent. of any correct assay yet obtained.

WITH THE TIMES.—The landlord of the Dutch Flat Hotel always endeavoring to keep pace with the times, has reduced the price of board at his hotel. He is willing to accommodate the public and is now showing his disposition to do so, notwithstanding beef is selling in the market at this place for eighteen cents and twenty-five cents per pound. The carriage belonging to this hotel leaves every morning for both the up and down trains of the Pacific railroad. If a few others in business in this place were to follow the example set by Mr. Seffens in this respect the result would soon be seen in a general revival and activity of busines life.

THEATRE.—On Thursday and Friday evenings of this week our citizens had an opportunity of witnessing some excellent acting by those general favorites the Misses Rand, Mrs. Chapman, Messrs. Graves Sinclair and others composing the troupe. On Thursday evening was presented Fraud and its victims, or the Streets of San Francisco by Gaslight, a new piece which was well rendered, the principal portions of which were performed by Misses Olivia and Rosa Rand, Messrs. Sinclair and Graves. They were frequently applauded, and their vocal performances encored. We are sorry our citizens did not see fit to give them more substantial evidences of their favor, but such monstrous outrages have been practiced upon them by undeserving troups heretofore that they hardly know when they are to be sold, and consequently refrain from patronizing really worthy, meritorious artists, as was the case in the present instance. The singing alone of the Misses Rand is richly worth the admission fee, and those who stayed away missed a treat.

ALL ABOUT ONE FINGER.—We noticed in our last the occurrence of a painful accident at Doane's mill near this place. The party to whom happened the accident is named Charles Norton, the accident occurred Friday instead of Saturday, and Norton lost three instead of two fingers.

NATURAL RESULT.—One of the results of the Eight Hour move is discernable in the following item which we clip from the Oakland *News* of the 6th instant:

We understand that the Board of State Prison Commissioners have increased the price of pris on labor from 30 cents to 50 cents per day.—The most of the contractors have assented to this advance. The revenue of the State from this source will be so far advanced by the change that a saving of $40,000 will be the result.

ROUGH ON THE NEW POLICEMEN.—The new Police ordinance adopted on Saturday evening, prohibts our new police force from entering liquor saloons or gambling houses except on official business. Morning "hours" and evening "nightcaps" are hereafter to be regarded as "unofficial."—*Oakland News.*

That's what might be called slightly puritanical. Why don't the Councilmen pass an ordinance prohibiting any of their own number from entering such places. Can't they stand it to cut their own supplies off?

MYSTERIOUS MURDER.—The Oakland *News* of May 2d relates the following:

On Thursday afternoon, about four o'clock, the body of A. S. Carpenter, an old resident of Contra Costa county, was found near his residence, about a mile and a half from the village of Almo, killed by a gunshot wound through his heart. Carpenter owned and cultivated a garden patch of about an acre, profusely adorned with trees, flowers and ornamental shrubbery. Carpenter was a Southern man, about fifty years of age. He had no family or relatives in this State, and his death still remains a mystery.

THE Mite Society meets at the Dutch Flat Hotel on next Tuesday evening. A cordial invitation is extended to all.

THE National Division of the Sons of Temperance convened in Nashville, May 6.

LABOR AND EMPLOYMEMT EXCHANGE.—We published last week an account of the operations of this Association taken from the daily *Alta;* we now publish below an address from the Association to the public, and invite its perusal by our readers, and their cordial co-operation. The expenses incidental to the praiseworthy objects of the Society are defrayed by voluntary contributions, the objects, as will be seen in the address, being to direct those who are in search of employment to such localities where they will command the best wages according to their capabilities; thus furnishing accommodation to capital while benefitting labor:

"At the present time, when the eyes of the world are turned towards this country, and the well established facts of its enormous mineral wealth, agricultural resources and advantageous geographical position have brought about the establishing of direct railroad communication with the Eastern continent, and steamship communication with Asiatic empires, it is not to be wondered at, that an unparalleled tide of immigration should set in to our shores.

To the reflective mind, it will therefore suggest itself that a movement is necessary for bringing about a healthy equipoise between CAPITAL and LABOR.

With a view, therefore, of preventing the evils of an imminent plethora of immigration producing in its train great vexation, and, in many instances, absolute want, the California Labor and Employment Exchange has been established.

Its objects will be, to learn from all reliable sources, throughout the State of California, where skilled or unskilled labor is needed, and can be used in all branches of industry; to ascertain where public lands are open for pre-emption and settlement, or private lands are for sale in small tracts, and to procure other information which may be of service to all persons arriving in the port of San Francisco with the intention of settling in the State, and engaging in labor of any description therein; to solicit and receive applications from employers of every description of labor throughout the State, for laborers and assistants; to communicate to employers of labor and laborers, and persons seeking employment or permanent settlement in California, all information within the reach of the Association, to the end that immigration may be encouraged, and all incoming farmers, mechanics, and laborers, may, with the least possible loss of time, be advantageously established in their several callings.

It is hoped (and indeed, counted upon) that this grand object will meet with the hearty co-operation of the community generally; that merchants, manufacturers, contractors, farmers, miners, and all others interested in the well-being of our State, will contribute of their means to its support.

Money is necessary to meet current expenses and after that, though not inferior to it as an element of success to the enterprise, is the sympathy and co-operation of the foregoing classes. It will avail nothing that thousands of individuals apply to the Association for work or information, if the friends of the movement do not furnish it to us.

As it is contemplated to keep on hand files of newspapers from all parts of the State and adjacent Territories, the furnishing of the same by their proprietors will be equivalent, *pro rata* to a subscription.

Correspondence from editors of newspapers is solicited, and suggestions from them will be thankfully received.

Information is solicited in regard to land, either for sale or open to pre-emption, suitable for farming purposes, with particulars as to climate, soil, adaptability to different farm products, fruits, vegetables, etc., accompanied, when possible, with maps and drawings.

Donations of books and pamphlets, embracing statistics and information of any character bearing upon the past, present, and future well-being of California, will meet with suitable appreciation.

In conclusion, all who can lend a helping hand in bringing CAPITAL and LABOR together, are expected to add their quota, and it is confidently believed, that if the assistance asked is rendered, the result will be a perfect homogeneity of action, which will lead to a rapid development of the resources of the State, and afford happy homes for thousands of the present inhabitants of over-peopled portions of the globe.

GENERAL BILWDLL'S WEDDING.—We find the following notice of General Bidwell's wedding in the New York *Express* of April 17th:

General John Bidwell, a wealthy land owner of California, an ex-member of the Thirty-Ninth Congress, was married at Washington on Thursday, to Miss Annie E. Kennedy, daughter of Dr. Joseph C. G. Kennedy. The bridesmaids were Miss Sallie Kennedy, the bride's sister; two Misses Gerolt, daughters of the Prussian Minister; two Misses Henry, daughters of Professor Henry; Miss Reynolds of Pennsylvania, and Miss Dixon, daughter of Senator Dixon of Connecticut. The groomsman were General Wistar and W. G. Sargent of Pennsylvania. The President, General Grant, and Major General Hancock were present. The bridal party left in the evening train for New York, and will take the first steamer for California, accompanied by the Rev. Dr. Gurley, who has leave of absence from his congregation.

PLANTING TREES.—The San Francisco *Bulletin* says:

Some of the interior papers are very wisely inculcating the general planting of trees by residents in rural towns and districts. As one of them says, there is hardly a homestead in California which could not be improved by the setting out of shade trees and shrubbery. The writer recalls Horace Greeley's quaint saying that the daughters of farmers who had their houses surrounded by trees, and their orchards abounding with fruit, would much more readily obtain good husbands than those who lived in bleak houses surrounded by dry, bare and bald fields and exposed to the driving of winter storms and the glare of summer heats. The plainest cottage, half buried in foliage, with its orchard and its flower garden, has more beauty and more of the air of comfort about it than a costly residence even with some architectural pretensions standing harshly out against the horizon. The man of moderate income, by devoting some of his leisure to planting, can give more elegance to his irregularly planned and rudely built homestead than a carpenter would by the expenditure of a thousand dollars on ornamental woodwork. Certainly he who erects a grove of trees around the house where he hopes to spend the best years of his life, leaves behind him that which will keep his memory green when all his other acts are forgotten.

DROWNED IN YOLO.—The Yolo *Democrat* of May 2d relates the following sad accident:

A daughter of Curtis, living on the bank of the Sacramento river, at the "Monument," ten miles above Sacramento, was drowned on Monday last. The water from the river had made a "crevasse" through the levee near Curtis' house, and a strong current of water was passing into the low land adjoining. The crevasse was narrow and a board had been thrown across. Miss Curtis was crossing, having in her arms a child, when one side of the bank having been undermined by the action of the water—gave way, precipatating her into the stream. Her cries and those of the child attracted parties from the house to the spot, when the body was found clinging to some willows and rescued. The bonnet of the girl was seen floating on the water, but she had passed beyond the possibility of rescue. The body was afterward recovered and followed to the grave by sorrowing relatives and friends.

INDIAN BATTLE.—A dispatch dated at Unionville, Humboldt county, Nev. May 4th, says that on the 29th ult., the Indians stole six horses in Paradise Valley, and next morning they were followed by a squad of soldiers from Camp Scott. The soldiers came upon two Indians driving the horses, and thinking there were no more charged on them, but when within about fifty yards of them were fired upon by fifteen others who were concealed in the rocks. Lieutenant Hunter and two others were severely wounded, one of the latter has since died on the morning of the 2d instant. Lieutenant Lafferty, with 17 men from Camp Scott, started in pursuit of the Indians. The Indians are headed by Big Foot, a noted Indian leader.

BURIED.—The bodies of Thomas Pearson, his wife and daughter, who were murdered by the Indians in Honey Lake Valley were buried in Sacramento on Tuesday.

## THE BALL—DRESSES.

ED. ENQUIRER:—Since the last issue of your paper I have heard so many regrets that you had not mentioned the ball more especially that I concluded with your permission to gratify some of the fair sex and assure them that their sweetness should not be wasted on the desert air. And if some of the most prominent dear ones are left out, remember that the head, not the heart, has erred; for I love them all and often think that some of their names should be handed down to posterity by the side of some of the self-made men of our day. But I digress, the ball with its fair ones was leaving my brain: As I sauntered into the room my first impressions were that the women had all had a set to and taken each other, instead of time, by the foretop, but a hungry brother at my elbow suggested the idea that chickens were employed in the place of hairdressers, and when supper time arrived I felt that the brother was correct and that the chickens must have been too tired to serve in any other capacity whatever.—Why could not rats have been employed; "tell me, ye winged winds," and then we might have had chickens. As a general thing, "when lovely woman stoops to folly" she tries to outdo her neighbors. This ball was no exception to the general rule. Such dresses; shades of my departed fore-mothers! Aint I glad you were not present? You would be convinced of that old adage—"There's nothing true but Heaven!" and folded your cloak around you and left. The apparent belle of the evening was Miss E. C., she was elegantly attired in a white cotton dress with strips of red flannel with pop-corn trimmings; her dress attracted considerable attention from its novelty. Miss M., with blue surrounding and a mosquito net around her throat was thought by many to be the best dressed lady in the room. Miss A. L. looked sweet in a red flannel dress, the only objection being its shortness. Miss E. H. in a dress of blue-paper muslin looked lovely; her sister looked majestic in a wine-colored calico with honiton timming. Miss M. D., of a near city, looked divine in pink calico with a tiara of red tape entwined around her noble brow.—Miss F. H. with Canton flannel over-dress trimmed with strips of the same, looked smiling as usual, though the glass beads she wore had rather the appearance of punishment, some persons thought they rather relieved the richness of her apparel. Miss C. A. with a green dress of window curtain stuff did look divine and was very much admired. The elegant Mrs. F. B. with her dress of white Lonsdale with trimmings of white was the center of all eyes. Mrs. G. was dignified and graceful in a green skirt with white flannel cape trimed to match the dress. The Misses F. of Auburn, in white calico and red wax roses in their heads with a flounce of the same looked sweet as usual. Miss M. B. in a gingham dress attracted many eyes by her gracefulness of manner and her usual gentleness. Miss E. M. in an embroidered paper muslin trimmed with red tape looked enchanting. The queenly Mrs. T. in a light calico was the recipient of more than her share of attention. Mrs. J. of Gold Run, was again an instance of the person becoming the dress instead of the reverse as is usually the case. Mrs. E. A. in a white cotton gored dress trimmed with red tape and pop-corn round her head looked as only Mrs. A. can look. But I must close for the present as I fear I have too long trespassed your indulgence. One word more: the gentlemen, the Brothers; how can I describe such toilets? They all looked sweet, sublime, magnificent, lovely, bewitching, majestic! I wonder if that ain't all I said about the Sisters, if it is, they will be content, if not have mercy, ye white vests—I'm not a "Bugcrusher." Mercy on Mark Twain, or Andy Johnson. I do not even aspire to Nasby Petroleum: only a mortal trying to please—another word and I am done, the Brothers wore red tape rosettes and some—changed their minds and wore white. I suppose the red ones gave out or perhaps they were worn to distinguish one gallant from another. The ball being a perfect success I close.

COLFAX.

BILLY BIRCH.—This laughable contraband will return to California in June. We clip the following biographical sketch of the gentleman from the Wilkes' *Spirit:*

He is bald and fifty-six years of age, lives on Washington Heights, next door to the New York Herald, in which paper the S. F. Minstrels are advertised free gratis on account of the neighborly feeling existing between the Great Humorist and the Great Misanthrope. Birch is of Turkish parentage, whence he derives many of those peculiartes which have made his photograph so common in young ladies' albums—smoking sitting cross-legged, oriental aversion to alcoholic stimulants, and superhuman calmness while his personal property is destroyed by fire. Is four feet high and three feet thick, but not in the head. He earns about $1,000 a week, which he is saving up to establish a Home for Old Ladies. M. Birch's costume in the street is singulary quiet and modest. A broadbrimed Panama hat, tastefully set off with a pendent Bismarck ribbon; a blue coat, swallow-tailed, with brass plates; double-breasted violet vest, worked with delicate threads of gold; green plush trowsers; Cherokee moccasins, worked in four colors; a diamond cluster as big as a skillet; white cotton gloves long in the fingers and short in the wrist, complete the unassuming attire of the famous minstrel. M. Birch is married but does'nt mind it much. Drives a pair of bays and light trotting wagon, and drives them tolerably well. Is addressed through the "Personals" of the N. Y. Herald as "Montagn Montressor." Birch weighs three hundred pounds, Troy weight, but is under training to reduce his weight so that Backus can throw him around handily. He was once wrecked on the Ceatral America, and floted about the Atlantic ocean for several months, whistling the Storm March and playing with a canary bird that he rescued from a watery grave. He wss eventually picked up by a passing West India schooner and invoiced as fruit to Raynor, where he may be found hanging out every day like a rich, ripe, fat bunch of bananas.

TRIAL OF A. M. SWANEY FOR MURDER.—This case came up yesterday in the Fifth District Court. Judge Cavis presiding.—The case has been brought here by change of venue, from the county of Mariposa, after an abortive trial in the town of that name.—*Stockton Gazette, May 7th.*

ILLINOIS imported enough lumber last year to build a three board fence twice around the world and once around herself.

AT WORK.—The following is a brief synopsis of the operations of the persecuted red men of the Plains which will doubtless be read with interest. The Sweetwater *Mines*, printed at Fort Bridger, says:

During the past week Indian hostilities have been committed, settler's houses have been burned to the ground, ranches and homes have been abandoned, and the settlements in the vicinity of Fort Laramie, and from there to Fort Fetterman, have been plundered by "Lo," the friend of the Indian Commissioners; and the country has been generally, particularly, and thoroughly put in order for the reception of the new commission which is to meet at Laramie, on the 7th of April.

Mr. Thomas Butler and E. H. Brown, Esq., the former of whom owned and occupied a ranch about six miles this side of Fort Laramie, arrived in this city yesterday, and bring an account of Indian difficulties which have been commenced from Laramie to Fort Fetterman, and which promise to be of a most serious and extensive character. They report that all the ranches between those two posts have been burned, and that seven citizens have been murdered, besides some soldiers the number of whom it is impossible to ascertain at present. They further state that all of the old settlers and mountaineers of that district—men who, as a class, are not easily frightened by Indians—believe that the Indians are leagued together for a general war of extermination of that and other frontier districts, in consequence of which they—the setters—have fled, some to Fetterman, and others to Laramie, for protection, and that the major portion of them will probably come to this city, as soon as possible, some being already on the way.

Mr. Butler had four of his mules stolen, and his partner lost five in the same manner, after which they concluded to abandon their ranch and seek safety in Cheyenne. Three men were killed at one ranch between the two forts, while four others who occupied the same place were told, after fighting two days, that if they would leave they should not be attacked, at least until after their arrival at Fort Laramie.

CALIFORNIA FARMING.—The Stockton *Gazett* tells of a farmer from up the San Joaquin who purchased thirty-four tons of grain bags at an expense of $11,800, in which to sack his wheat the coming harvest. This is a sample of the extensive manner in which Californians enter into the business of farming. The weight of the sacks alone is greater than many entire crops of quite large Eastern farmers, and their cost would constitute a large income to the farmer. This is a large tax upon the farmer, as his sacks are not returned to him, and this will probably soon lead to the shipping of the grain in bulk.

## OBITUARY.

Died, March 30th, 1868, IDA PITMAN, aged 10 years and 6 months.

WE often hear of angel visits—we often hear of angel departures. Our hearts and thoughts follow them as to a *far* country. It is not so far but they return to us as ministering spirits, not so far but we shall soon go to them. The one who has left us so early lived long enough to weave golden cords of affection around many hearts. Shall we murmur that they have been severed? Shall we ask with rebellious hearts why she has been bidden to "come up higher" ere the mission of life could seem to have been fulfilled? The hearts that sorrow most can best answer, as they find from day to day that love has winged their thoughts and is taking them from the dross of earth to follow Ida in her upward flight. We are told of the wisdom of the Alpine shepherd, who, finding the lower pastures dry and parched, seeks to to draw his flock upward, and when the timid sheep fear to climb the higher cliffs he takes the lambs in his arms and going forward soon finds the cords of love drawing upwards the sheep that would not listen to his voice.

Ida was a Sunday School scholar and a very attentive reader of the valuable books thus brought before her from week to week. That the truth had its vitalizing influence upon her heart was made mahifest in her life before her last sickness. There was not only an increase of gentleness and patience with her younger brothers, but an earnest solicitude for their spiritual as well as temporal welfare. One who had omitted his prayers during his mother's illness she gently brought back to attend to his nightly duty. And one still younger she was teaching to fold his hands in prayer and lift his little heart to God. When sickness came and death threatened she not only maintained the utmost serenity and composure but expressed the joy of the soul that trusts in the Redeemer by singing daily the songs of Zion. And she ceased not until the day before her departure, when the cold hand of death had begun "to loosen the silver cord." Among her last and favorite songs was the following:

"I had a dream just now, mother,
I dreamed an angel came,
And stood beside my bed, mother,
And gently spoke my name.

I woke. It was a dream, mother,
And in her place stood you:
But what he said I know, mother,
Will certainly prove true.

Remember then to-morrow eve,
He will most surely come,
And fly with me far, far away,
To his angelic home."

Ida was always a studious child. She embraced every possible moment to improve her mind. But the seeds of death had been long sown and gave reason to fear that though life should be prolonged, health could never be secured. Therefore those who love her best would not call her back. They may weep, "Jesus wept." How precious the record to sorrowing hearts. But in the midst of their grief they hear the precious words "I am the resurrection and the life. He that believeth in me, though he were dead yet shall he live." So commingling tears of sorrow and joy they earnestly pray that all may have the same faith that enabled Ida to go singing down to the brink of the dark river, testifying when sight and hearing failed by a bright smile the perception of a brighter day beyond.

PREACHING at the Union Church to-morrow morning at the usual hours.

THERE will be preaching in the M. E. Church on Sunday at the usual hours, morning and evening.

K. K. K.—The police of Memphis, it is said, recently made a raid upon a lodge of the Kuklux Klan, and succeeded in capturing a copy of the constitution and by-laws of this infamous organization, in which was found the following ritual for initiation and oath administered to the candidate:

All candidates shall be balloted for in open council, and if any candidate receive three black balls, he cannot be admited. As soon as a candidate is elected, he shall be introduced by a brother appointed by the Grand Cyclops. The members of the Lodge, all shrouded, will rise and receive him and conduct him into the middle of the room. Each member of the Order shall have a drawn dagger or other weapon in his hand, pointed towards the candidate, to swear that should said candidate prove recreant to the oath which he is about to take that he will kill him, and make it his especial duty to do so on the first *safe* opportunity. As soon as the shrouded brothers have taken the above oath the following charge and oath shall be administered by the Grand Cyclops, or, in his absence, the Vice Grand:

"Here, in the presence of this skull and the members here assembled, I solemnly swear to be true to the order, to its members, individually and collectively, and should I ever by sign, word, or deed, betray a secret, or a member of the brotherhood, that the skull upon which I now look may be a counterpart of mine, and I hope that all the social relations which I now enjoy may be sundered; that honesty in the men or virtue in the women may not be known in my family or generation, and that all who own my name may be branded as dogs and harlots. I further swear to obey implicitly the orders of the Grand Cyclops, regularly issued through his council, and as soon as I receive an order to fulfill it. I again swear that, should a member of this Order be in danger, that even at the risk of my life, I will defend and endeavor to save him; that I will give no outward sign or hint that a person may know of the existence of the K. K. K., unless authorized by the Grand Cyclops, and that each member of this Order, as soon as the sign is given, I will recognize, defend, and protect as a brother. I further swear that I will, under and in all circumstances, bear true allegiance to the South and her interests, as interpreted by the Supreme Cyclone Council, as when I receive its orders, should I be even in the embrace of my wife, I will leave her to obey them. I further swear that all radicals and negroes who have placed themselves opposite to the interests of the owners of soil in Tennessee shall ever be my enemies, and that under no circumstance will I have any connection with them, if I can help it, than to welcome them with bloody hands to hospitable graves. That my family and the family of a radical never shall exchange visits; and I further pray that the God of the Southland, whom I now invoke, shall strike me dead should I ever, in word or spirit, infringe upon the things set forth in this oath. To all of which I swear in honesty of heart and sincerity of purpose. So help me God."

A DISPATCH to the San Francisco *Times* dated Santa Clara May 5th says:

A FATAL ACCIDENT.—James J. Fenton a very promising young man of about twenty years of age, and son of Patrick Fenton, Esq., formerly of San Francisco, who now resides on his farm near Santa Clara, met with an accident on Sunday last, which resulted in the loss of his life. About three o'clock in the afternoon of that day he told his mother he was going to visit a neighbor, and would return home by bed-time. He left, and after spending the evening started to return and when on his father's farm, and crossing the Guadalupe river, the banks of which were high and slippery, it is supposed his horse scared, stumbled or fell, throwing young Fenton into the stream, and from marks on his head it is supposed he struck a piece of timber, and was stunned so he drowned. His body was recovered this afternoon.

A PRACTICAL JOKE.—The Cincinnati *Times* is answerable for the following:

On the 1st of April, at evening, the door bell of a Cincinnati merchant rang, and on the step was found a basket with a beautiful baby in it, and a note signed "Cora," addressed to the man of the house, saying she was unable to suport it without his aid, and as he was as nearly related to it as she was, and the babe was sent to him for good treatment and education. The appearance of the child and the explanatory note, produced a domestic scene more easily imagined than described. The husband fell on his knees, protesting by all the saints that the child was not his while the wife as earnestly protested her full belief that it was his, and nobody's but his. In the midst of these mutual protestations the husband's eye chanced to fall on the empty cradle of his own baby in one corner of the room, and the whole thing flashed to him at once—he was sold, thoroughly sold—and declared at once that he would fathter the child and any other that his wife might charge him with.

BOLD BURGLARS.—The Stockton *Independent* of May 5th has the following:

Last Saturday night some burglars entered the residence of J. Sarles, residing in Washington Gardens, on Washington street, and succeeded in getting $7. They left no traces behind them. Last night, about one o'clock, Miss Sarles was startled from her sleep by two burglars entering her room, which was situated a short distance from that of her parents. She became frightened that she could not make an alarm. The burglars had their persons well screened by large cloaks and other disguises. They were provided with a dark lantern, the light of which was nearly hidden from view. Immediately on Miss Sarles discovering the scoundrels they decamped in a twinkling, when the young lady recovering her self-possession gave an alarm. By the time assistance arrived the burglars had made good their escape. On this last raid the burglars succeeded in getting $106. We earnestly hope they may be soon apprehended, and brought to a strict account. It has been our lot to record and read of many daring burglaries, and of nearly every conceivable description, but this one we have just mentioned is in its being a double robbery—so to speak—far ahead of anything yet coming to our knowledge. The burglars probably were satisfied that a large sum of money was keptin the house, and not finding it the first night they hunted it up the next night, knowing well that no one would expect a second attack immediately on the heels of the first.

**SOME years since, while residing** in the city of Providence, we heard much said in Praise of Perry Davis' Pain Killer. We listened incredulously to these testimonials. Well, health failing, as a last resort, the doctors sent us to Minnesota. The winter was intensely cold, and a terrible form of Neuralgia prevailed among the settlers, and we fell into the grasp of the disease, and day and night, for weeks, endured untold agony. Many remedies were tried without avail. One day, however, a stalwart frontiersman entered the room, bearing in his hand a vial partly filled with a reddish liquid. It was some of the Pain Killer. He had bought in California three years before, and had kept it with miserly care until then. Applying it externally and internally gave immediate relief. Since then, we have recommended it successfully in cases that baffled the best medical skill; and, when we see persons reject this remedy, we recall our own experience, and think that the time may come when pain incurable by other agents, may teach them the value of this great discovery.—*Home Monthly.* c21 1m

HOPE FOR THE AFFLICTED.—In another part of this paper will be found the advertisement of the celebrated Institute established by Dr. J. C. YOUNG, in 1850. In this age of deceit and charlatanism it is a boon to the suffering to point out to them where they are sure of obtaining the wished for relief and cure. Under the care of the skillful Doctor the sickand troubled can divest themselves of their burdens of pain; lay aside their cross, and secure health and happiness. If you are sick or in trouble, do not hesitate. Read the advertisement and follow the advice. Do not forget the number or the manner of directing your letters. Consultation Office, 540, Washington street, San Francisco.

MEDICAL ADVICE.—DR. WM. K. DOHERTY'S Medical and Surgical Institute is becoming a sine quo non to the welfare of our State and health of our citizens; and his rapidly spreading reputation, although it may excite surprise, is but the signal of skill, and follows as the natural result of such a cause. We are personally acquainted with gentlemen who had suffered for years under chronic disease, and who had taken advantage of every available means that promised relief, but without success, until they called upon Dr. Doherty, who, in an incredibly short space of time, has given them entire relief. It is gratifying to announce this fact, because the Dr. is a gentleman who seeks, not by defamation of others to establish his reputation or ruin of another's fame. The Doctor conducts his own Institute in such a manner must be gratifying to all his patients. He examines, advises, and recommends without charge, and the patient, after hearing his terms for treatment, can accept or reject at pleasure. In no case does the Doctor make a charge unless he effects a cure. This he is able to do, because he feels the confidence which long experience has given, and no doubt consolation which appertain to that confidence. Persons afflicted with either acute or chronic disease, would do well to consult the Doctor; at all events, it can do no harm, as for consultation he asks no fee; nor does he insist on obedience to his advice unless the patient places himself under his care. His offices are on Sacramento street, opposite the Pacific Mail Steamship office.—News

**R. R. R.**
**RESOLVENT.**

*One Bottle of Resolvent Better than Ten Large Bottles of Sarsaparilla.*

**One Bottle will Purify the Blood, and Expel Corruption from the Body!**

So swift is this remedy in entering into the circulation, that it has been detected in the blood and urine in six minutes after it has been taken.

☞ 1 BETTER THAN 10 ☜

R. R. R. Resolvent cures with astonishing rapidity every form of Chronic, Scrofulous and Skin Diseases, and exterminates all corruption from the human system.

One bottle of Dr. Radway's Renovating Resolvent contains more of the active curative principles of the best Jamaica Sarsaparilla, (Sarsaparillian,) than Ten of the largest size bottles of the mixture sold under the name of Sarsaparilla.

The process adopted by Dr. Radway in securing extracts (prepared in vacuo,) of Medicinal Roots, Plants, Herbs, and other vegetables possessing great curative properties over Scrofula, Chronic, Syphilic and skin diseases, that enters into the composition of the Renovating Resolvent, produces only ONE OUNCE of the pure extract out of 20 lbs of crude roots. The Inert matter that enters so generally in the large bottle mixtures and prepared under the officinal or pharmacopeia formula, is, by Dr. Radway's process, cast aside as rubbish.

One teaspoonful of the Resolvent is sufficient for a dose for all Skin, Salt Rheum, Pimples, Blotches, Sores and Eruptions of the Skin, Humors in the Blood, &c.

One teaspoonful, three times a day, will, in a few days, make the Blood pure, the Skin clear, the Eyes bright, the Complexion smooth and transparent, the Hair strong, and remove all Sores, Pimples, Blotches, Pustules, Tetters, Cankers, &c., from the Head, Face, Neck, Mouth and Skin. It is pleasant to take, and the dose is small.

The first dose that is taken seizes on the disease and commences its work of resolving away all diseased deposits, Purifying the Blood, and driving corruption from the system.

The Renovating Resolvent, if used in any of the following named complaints, will positively cure the patient:

**Skin Diseases, Caries of the Bones, Humors in the Blood, Constitutional, Chronic and Scrofulous Diseases, Scrofula, Syphilis, Fever, Ulcers, Sores, Salt Rheum, Erysipelas, Rickets, Scald Head, Cankers, Sore Legs, White Swellings, Glandular Swellings, Boils, Nodes, Sore Ears, Sore Eyes, Strumous Discharges from the Ear, Opthalmia, Itch, Constitutional Debility, Skin Eruptions, Wasting and Decay of the Body, Pimples and Blotches, Tumors, Cancerous Affections, Dyspepsia, Water Brash, Neuralgia, Chronic Rheumatism and Gout, Diseases of the Kidneys, Bladder, Urethra, Strictures, Difficulty of Passing Water, Calculous Deposits &c.**

ALARMING INCREASE OF BLADDER, KIDNEY and CALCULOUS DISEASES.

The annual reports of the Health Commissioners of different cities, show a great increase of deaths from diseases of the Kidneys and Urinary Organs—RADWAY'S RENOVATING RESOLVENT is the only remedy *that has dissolved* calculous concretion.

Its SOLVENT, *diuretic, lithontriptic* and *tonic* properties exceed that of any medicine in the world; it readily assimilates with the fluids, and promotes their exit through the Kidneys, Urethra and Bladder, removing calculous obstructions, and correcting all derangements of these organs.

*So swift is this remedy in passing into the circulation, that it has been detected in the urine in six minutes after it has been taken;* by adding to the liquid when cold a few pieces of starch, then a few drops of nitric acid, the liquid will change to a blue color. When brick dust, or a thick white deposit, like the white of an egg, (albumen,) is detected in the vessel, or bloody discharges from the urethra, or micturating in drops, accompanied by a burning or scalding pain—the RESOLVENT should be used and R. R. RELIEF rubbed on the spine, &c.

RADWAY'S PILLS being an aperient, soothing, and tonic laxative, are the only purgative medicine safe to administer in these difficulties; their mild soothing and healing properties produce evacuations without irritating the mucous membranes of the bowels, kidneys, ureter, bladder, &c., or causing straining when at stool.

Price of Resolvent, $1 per bottle, or 6 for $5. Pills 25 cts. R. R. Relief, 50 cts. per bottle. Principal Depot, 87 Maiden Lane, N. Y. Sold by all Druggists and Country Merchants.

A great French Physician says: "More than half of the disease in the world comes from neglect to fortify the system against changes of climate, weather and food. The great secret of health is to keep the condition of the Stomach and Blood regular and uniform, so that changes from Heat to Cold, from Dry to Damp, etc., cannot upset the machinery of the body, and breed disease."

Now, it is a fact, positive and well known, that there is no such bulwark and assistant for the Stomach as

**PLANTATION BITTERS.**

This splendid tonic is now used by all classes of people for every symptom of a "Stomach out of order."

The secret of it is this: Plantation Bitters are certain to correct the juices of the Stomach set all its machinery at work, and enable it to resist and throw off the approaching danger The tendeny of the operations of Nature is always towards a cure; all she needs is a little assistance at the proper time. How much more reasonable and sensible it is to help her along with a gentle, yet powerful Tonic, than to deluge and weaken and defeat her curative processes with poisonous drugs and fiery mixtures, which only stupify and plant the seeds of disease and death.

## THE SCIENCE OF HEALTH!

**Every Man His Own Physician.**

**HOLLOWAY'S PILLS,**

AND

**HOLLOWAY'S OINTMENT!**

**Disorders of the Stomach, Liver and Bowels.**

The stomach is the great centre which influences the health or disease of the system—A body debilitated by excess—indigestion, offensive breath and physical prostration are the natural consequences. Allied to the brain, it is the source of headaches, fllental depression, nervous complaints and unrefreshing sleep. The Liver becomes affected and generates bilious disorders, pains in the side, &c. The Bowels sympathize by Costiveness, Diarrhœa and Dysentery. The principal action of these Pills is on the stomach, and the liver, lungs, bowels and kidneys participate in their recuperative and regenerative operation.

**Erysipelas and Salt Rheum,**

Are two of the most common and virulent disorders prevalent on this continent, to these the Ointment is especially, antagonistic, its "modus operandi" is first to eradicate the venom and then complete the cure.

**Bad Legs, Old Sores, and Ulcers.**

Cases of many years' standing, that have pertinaciously refused to yield to any other remedy or treatment, have invariably succumbed to a few applications of this powerful unguent.

**Eruptions on the Skin.**

Arising from a bad state of the blood of chronic diseases, are eradicated, and a clear and transparent surface regained by the restorative action of this Ointment. It surpasses many of the cosmetics and other toilet appliances in its power to dispel rashes and other disfigurements of the face.

**Female Complaints.**

Whether in the young or old, married or single, at the dawn of womanhood, or the turn of life, these tonic medicines display so decided an influence that a marked improvement is soon perceptible in the health of the patient. Being a purely vegetable preparation, they are a safe and reliable remedy for all classes of Females in every condition of health and station of life.

**Piles and Fistula.**

Every form and feature of these prevalent and stubborn disorders is eradicated locally and entirely by the use of this emolient; warm fomentations should precede its application. Its healing qualities will be found to be thorough and invariable.

**Both the Ointment and Pills should be used in the following cases:**

| | | |
|---|---|---|
| Bunions, | Piles, | Sore Legs, |
| Burns, | Rheumatism, | Sore Breasts, |
| Chilblains, | Ringworm, | Sore Heads, |
| Fistula, | Salt Rheum, | Sore Throats, |
| Gout | Scalds, | Sprains, |
| Stiff Joints, | Tetter, | Ulcers. |
| Lumbago, | Skin Diseases | Venereal Sores, |
| Sores of all kinds, | Mercurial Eruptions, | |
| Swelled Glands, | Wounds of all kinds. | |

**CAUTION.**—None are genuine unless the words "HOLLOWAY, NEW YORK AND LONDON," are discernible as a *Water Mark* in every leaf of the book of directions around each pot or box; the same may be plainly seen by *holding the leaf to the light*. A handsome reward will be given to any one rendering such information as may lead to the detection of any party or parties counterfeiting the medicines or vending the same, knowing them to be spurious.

The Merchants' and Manufacturers'

**Jewelry Association**

Calls your attention to the fact of its being the largest and most popular Jewelry Association in United States. The business is and always has been conducted in the most candid and honorable manner. Our rapidly increasing trade is a sure guarantee of the appreciation of our patrons for this method of obtaining rich, elegant and costly goods. The sudden stagnation of trade in Europe, owing to the late German war, and recent disastrous financial crisis in Europe, has caused the failure of a large number of jewelry houses in London and Paris, obliging them to sell their goods at a great sacrafice, in some instances less than one third the cost of manufacturing. We have lately purchased very largely of these bankrupt goods, at such extremely low prices that we can afford to send away finer goods, and give better chances to draw the most valuable prizes than any other establishment doing a similar business. OUR AIM IS TO PLEASE, and we respectfully solicit your patronage, as we are confident of giving the utmost satisfaction. During the past year we have forwarded a number of the most valuable prizes to all parts of the country. Those who patronize us will receive the full value of their money, as no article on our list is worth less than one dollar, retail, and there are no blanks. Parties dealing with us may depend on having prompt returns, and the article drawn will be immediately sent to any address by return mail or express.

The following parties have recently drawn valuable prizes from the Merchants' and Manufacturers' Jewelry Association, and have kindly allowed use of their names.

[DR. KEYSER is a physician of over thirty years' experience, and a graduate of the Jefferson Medical College and of the University of Medicine and Surgery of Philadelphia.]

MR. H. T. HELMBOLD:

DEAR SIR:—In regard to the question asked me as to my opinion about BUCHU, I would say that I have used and sold the article in various forms for the past thirty years. I do not think there is any form or preparation of it I have not used or known to be used, in the various diseases where such inedicate agent would be indicated.

You are aware, as well as myself, that it has been extensively employed in the various diseases of the bladder and kidneys, and the reputation it has acquired, in my judgement, is warranted by the facts.

I have seen and used, as stated before, every form of BUCHU—the powdered leaves the simple decoction, tincture, fluid extracts; and I am not cognizant of any preparation of that plant at all equal to yours. Eighteen years experience ought, I think, to give me the right to judge of its merits, and with ut prejudice or partiality, I give yours precedence over all others.

I value your Buchu for its effects on patients. I have cured with it, and seen cured with it, more diseases of the bladder and kidneys than I have ever seen cured with any other proprietary compound of whatever name, or any other Buchu.

Respectfully yours, &c.,

**THIS CELEBRATED INSTITUTE**

has enjoyed on this coast an uninterrupted success of fourteen years, and has become one of the renowned Hospitals of the age. What the celebrated Lock Hospital is to London, and the no less renowned establishment of Ricord is to Paris, this Institute has become to the Pacific coast. The thousands annually received and cured place it in point of number of patients among the very first of the world, and the success of its treatment ranks it second to none.

PRIVATE DISEASES IN MALES and IRREGULARITIES IN FEMALES are the great destroyers of health. They insidiously attack the system and gradually undermine and destroy it; they drive the bloom from the cheek, the lustre from the eye, the strength from the frame; they give to the world puny and diseased offspring, and poison, through successive generations the race of man. The marks can be seen in Scrofula, Consumption, Cripples, the Idiotic, the Paralytic, the Insane, etc.

There is no more terrible scourge to the human race than those diseases arising from the contamination of Venerial Poison. The mildest forms, by retreating to the blood, hold over the afflicted one, the destruction that is liable at any moment to fall and blight—to utterly destroy—all earthly hopes.

MERCURY, recognized as the most fatal medical enemy to man, combining with the Venereal, doubles its dangers. Those who have been treated with that pernicious mineral poison are not cured; the disease has only assumed a new form.

**Do not be satisfied with partial cures**

that leave the poison to crawl through the system, eating its way into the tissues and organs beneath the apparently smooth surface, to burst out in the future with a virulence that will baffle the effects of medicine. WHEN PERFECT CURES can be obtained by consulting a physician whom long practice and thorough investigation into the causes of DISEASES of the URINARY ORGANS enables to determine at once the nature of the disease.

**Seminal Weakness or Spermatorrhœa.**

The young man who experiences that growing weakness in his muscular and mental organization, should stop to consider whence it arises. He will find in the weakness of the back, trembling of the limbs, disordered digestion unaccountable failing of the powers of the mind, distaste for society, dread of impending trouble, forebodings of evil, sleeplessness, troubled and lascivious dreams, accompanied by growing deafness, loss of muscular power, and numerous other symptons of disorganization, the positive traces of that most terrible and destructive of all diseases Seminal Weakness—wasting away his powers, destroying his hope of life and manhood, and dragging him along the broken path of his existence towards a premature and loathsome grave. To him who finds his life dribbling out in the discharge of the vital principle of existence in nocturnal and diurnal emissions, the mere cessation of its appearance brings no assurance of relief.

Marriage, that holy office, the safeguard and hope of manhood, brings to such an one no hope of cure, but adds to his misery in the knowledge that the one who looks to him for somuch of her happiness, is a victim to this evil, and an innocent companion of his punishment. He adds to his misery and disorder until hope leaves him. There is no rescue except in proper and skilful treatment. Consult them at once, a physician whom long practice and careful research has made thoroughly conversant with every phase of the disease. Those who have become the victims of solitary vices, that dreadful, fascinating and destructive habit, which fills thousands of sick-rooms with paralytics and consumptives, and hundreds of unfilmely graves with its misguided victims, should consult, without a moment's delay, one who will sympathize with their sufferings. To such the Doctor would especially address himself, giving to each and all assurance of a PERFECT and PERMANENT CURE, without hindrance to business, change of diet, or fear of exposure.

Do not forget the address. See below.

**Important to Females.**

When a female is in trouble, or afflicted with disease and requires medical or surgical assistance, the enquiry should be, Where is there a physician who is fully competent to administer relief, and whose respectable standing in society recommends him to the confidence of the community? The Doctor understanding how imperatively necessary these requirements are, feels called upon to interpose, and beg the attention of the afflicted to the fact that he has been a Professor of Obstetrics and Female Diseases for twenty years, and is fully qualified to administer in all cases, both medically and surgically, not in a superficial manner, but in as thorough a manner as years of study and practice—both in hospitals and private families—can make, to save them from the hands of the unqualified, unscrupulous and designing. Therefore families can rely upon him as upon a father. All in affliction can find in him one who will feel and sympathize with and befriend them in trouble—one in whose secrecy the utmost confidence can be placed. Consultation by letter or otherwise, FREE. See address below.

THE CELEBRATED FEMALE REMEDIES, compounded from the private prescription of Dr. Young, have now obtained a most extended popularity, and are correctly viewed to be the safest and surest remedies for the complaints for which they are applied. ## FRENCH MEDICAL OFFICE

DR. JULIEN PERRAULT, Doctor of Medicine of the Faculty of Paris, Graduate of the University Queen's College, and Physician of the St. John Baptiste Society of San Francisco.

DR. PERRAULT has pleasure to inform patients, and others seeking confidential medical advice, that he can be consulted daily at his office, Armory Hall Building, North-East corner Montgomery and Sacramento streets, San Francisco. Rooms No. 9, 10, 11, first floor, up stairs, entrance either Montgomery or Sacramen Streets.

DR. PERRAULT'S studies have been almost exclusively devoted to the cure of the various forms of Nervous and Physical Debility, the results of injurious habits acquired in youth which usually terminate in impotence and sterility, and permanently induce all the concomitants of old age. Where a secret infirmity exists involving the happiness of a life and that of others, reason and morality dictate the necessity of its removal, for it is a fact that premature decline of the vigor of manhood, matrimonial unhappiness, compulsory single life, etc., have their sources in causes, the germ of which is planted in early life, and the bitter fruit tasted long after-ward; patients, laboring under this complaint, will complain of one or more of the following symptons: Nocturnal Emissions, Pains in the Back and Head, Weakness of Memory and Sight, Discharge from the Uretha on going to stool or making water, the Intellectual Faculties are Weakened, Loss of Memory ensues, Ideas are clouded and there is a disinclination to attend to business, or even to reading, writign or the society of friends, etc. The patient will probably complain of Dizziness, Vertigo and that Sight and Hearing are Weakened and sleep disturbed by dreams, melancholy, sighing, palpitations, faintings, coughs and slow fever; while some have external rheumatic pain, buess of the body. Some of the most common symptons are pimples in the face and aching in different parts of the body. Patients suffering from this disease, should apply immediately to Dr. PERRAULT, either in person or by letter as he will guarantee a cure of Seminal Emissions and Impotence in six to eight weeks.

Patients suffering from venereal diseases in any stage Gonorrhea, Gleet, Strictures, Bubo Ulcers, Cutaneous Eruptions, etc., will be treated successfully. All Syphilitic and Mercurial Taints entirely removed from the system.

DR. PERRAULT'S diplomas are in his office, where patients can see for themselves that they are under the care of a regularly educated practitioner. The best references given if required.

Patients suffering under chronic diseases, can call and examine for themselves. We invite investigation; claim not to know everything, nor to cure everybody, but we do claim that in all cases taken under treatment we fulfil our promises. We particularly request those who have tried this boasted doctor, and that advertised physician, till worn out and discouraged, to call upon us.

Low charges and quick cures. Ladies suffering from any complaint incidental to their sex, can consult the doctor, with the assurance of relief.

**Female Monthly Pills.**

DR. PERRAULT is the only agent in California for DR. BIOT'S Female Monthly Pills. Persons at a distance can be cured at home, by addressing a letter to Dr. PERRAULT, corner of Sacramento and Montgomery streets, Rooms 10 and 11, or Box 973, P. O., San Francisco, stating the case as minutely as possible general habits of living, occupation, etc., etc.
